

PONDerings - an update

Our pond is one of the first features that greet us as we enter the retreat. As we drive by, perhaps we look over to see what birds are at the pond, are the fish rising, how high is the water, is the waterfall cascading...

How do we wish to see our common property evolve? At our most recent AGM, it was decided that our priorities for the pond landscape for this year would be to install new siding on the pump house and to reinforce the berm at the backside of the waterfall.

With many thanks to our Pond Committee and their volunteers, these tasks have been completed.
